a/ - Estimated Total Irrigable Area (ETIA) is based on the 3 percent slope criteria

For provinces with service area greater than the ETIA, it means that more area are now irrigated beyond the ETIA. eg Benguet & Mt. Province

Converted Areas to other land use other than agriculture and Permanently Non-Restorable Areas that were previously developed for irrigation were deducted from the original ETIA of 3,126,340 hectares

b/ - Includes newly developed areas in CY 2022 (Current Program and Carry-Over Program)
